<https://github.com/JuanPGalli>

Full Stack Developer with a background as a certified public accountant in the banking industry, encompassing roles in both auditing and administrative sectors. This background has equipped me with the ability to work collaboratively, analyze extensive datasets, and pay meticulous attention to details. Specialized in Back-end development, I possess expertise in Agile methodologies, GIT, data structures, algorithms, frameworks, and CSS.

My experience extends to Front End and Back End development using JavaScript, ReactJS, Redux, Express, NodeJS, PostgreSQL, and Sequelize. Actually learning TypeScript. I bring resilience, attention to detail, and strong teamwork skills to every project. English proficiency level: B2.

PROYECTOS

Full Stack Web Developer - HelpCommunity

Oct. 2023 - Oct. 2023

Academic Experience: Henry Bootcamp

E-Commerce Application aimed at selling products while showcasing donation campaigns with donation-related information. Access can be granted through Google or by manual registration, and it is controlled through Firebase. Products can be sorted and filtered by price and category. MercadoPago was integrated as the payment platform. Features include a shopping cart, review functionality, stock control, email purchase confirmation, and a search bar. Additionally, it includes an administrator dashboard with statistics, administrator permission buttons, user blocking, sales history, product creation and editing, campaign creation, and mass email sending to users.

My role in the project:

- *Entity-Relationship Model in Figma.*
- *Create models and their constraints.*
- *Establish relationships between these models.*
- *Develop routes for Products and Campaigns.*
- *Automate the sending of confirmation emails for product purchases and mass emails.*

Front: ReactJS, Redux, CSS, Cloudinary, Firebase

Back: Express, NodeJS, NodeMailer, MercadoPago

Database: PostgreSQL y Sequelize.
