PROJECTS Portfolio: <https://jpgdev.vercel.app/>

Full Stack Developer – Help Community e-commerce

Oct. 2023 - Oct. 2023

Academic Experience: Soy Henry bootcamp final project

Develop an e-commerce application to sell products and donation campaigns. User access is facilitated through Google login or manual registration, managed via Firebase. The application allows products to be sorted and filtered by price and category. Integrate MercadoPago as the payment gateway. Key features: shopping cart, product reviews, stock control, email purchase confirmations, and search bar. Administrator dashboard with comprehensive statistics, administrator permission controls, user blocking, sales history, product creation and editing, campaign creation, and mass email distribution to users.

My role in the project:

- Create the Entity-Relationship Model in Figma.
- Create the models and their constraints.
- Establish the relationships between these models.
- Develop the routes and the CRUD operations for products and donation campaigns.
- Automate the sending of confirmation emails for product purchases and bulk emails.

Front: ReactJS, Redux, CSS, Cloudinary, Firebase

Back: Express, NodeJS, NodeMailer, MercadoPago

Database: PostgreSQL y Sequelize.

Deploy: <https://help-community-ecommerce.vercel.app/>

Full Stack Developer – F1 Drivers SPA

Sept. 2023 - Sept. 2023

Academic Experience: Soy Henry bootcamp individual project

Develop individually a SPA that includes features such as filtering, external API integration, relational databases and controlled forms.

Front: ReactJS, Redux, CSS

Back: Express, NodeJS

Database: PostgreSQL y Sequelize.

Deploy: <https://f1-drivers-spa.vercel.app/> Demo: <https://youtu.be/5EJk7emG87s>
